

STUMP PULLER

PHONE: 1-800-952-7849 EMAIL: trk@trkattachments.com WEBSITE: www.trkattachments.com
19 Yale Crescent, St. Catharines, Ontario L2R 2Y6

Built Tough

Constructed from T1 & AR400 Steel at all critical points.

Serrated Edge

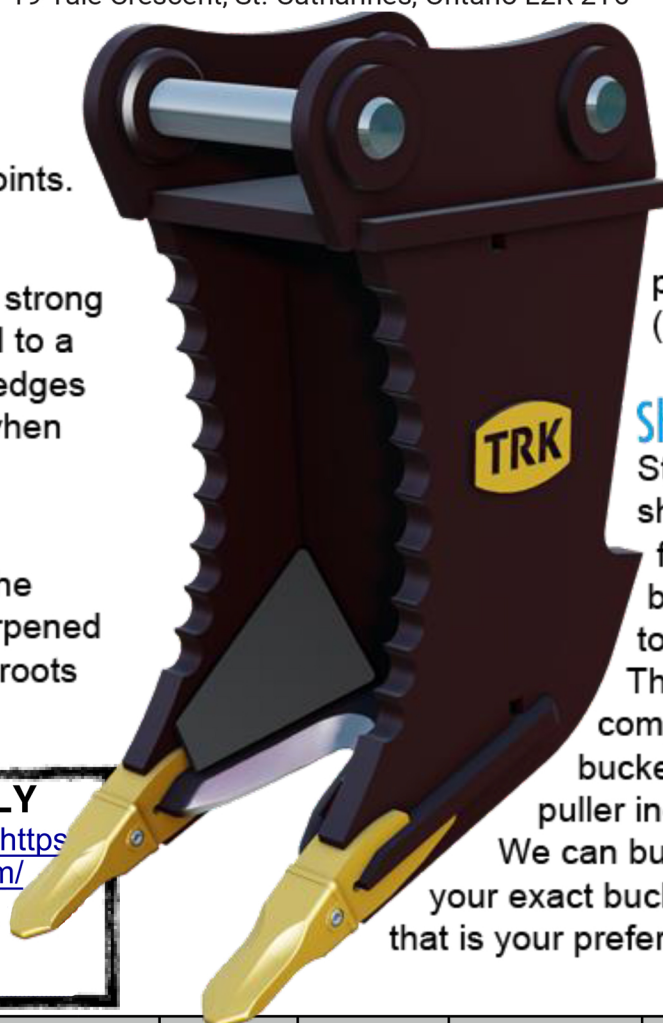

Double shanks get an extra strong grip on the stump compared to a single shank ripper. Shank edges serrated to grip the stump when pulling it out.

Bevelled Cutting Edge

The cutting edge between the shanks is bevelled and sharpened to make slicing through tap roots a breeze!

PINS SOLD SEPARATELY

Please see our pin prices at: <https://www.trkattachments.com/>

Replaceable Teeth

Comes with CAT style J-Series teeth. Other tooth preferences available (please inquire).

Shank Length

Standard length of shanks is measured from below the baseplate of the ears to the tips of the teeth. This is a reduced length compared to a normal bucket to give the stump puller increased break force. We can build stump pullers to your exact bucket length (tip radius) if that is your preference (please inquire).

Machine Weight Class	Product Code	Weight	Width	Length	CAT Style Tooth
12 - 16 Tons	DSSP-015-12-16-2	955	15"	30"	J300
17 - 21 Tons	DSSP-018-17-21-2	1350	18"	36"	J300
