The Parker Denison R1V12-533-001-S5 is a discontinued pilot-operated hydraulic relief valve designed to regulate system pressure and protect components from overpressure. The following components have been identified as a replacement combination: R4V0657310A1 and S26-53511-0. See figures 1 and 2 below.

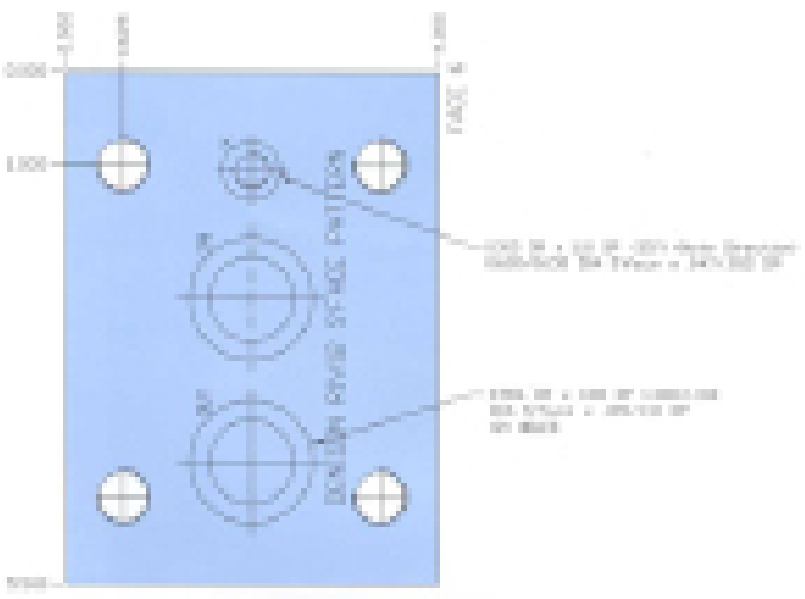

Figure 1: Discontinued Parker Denison R1V12-533-001-S5

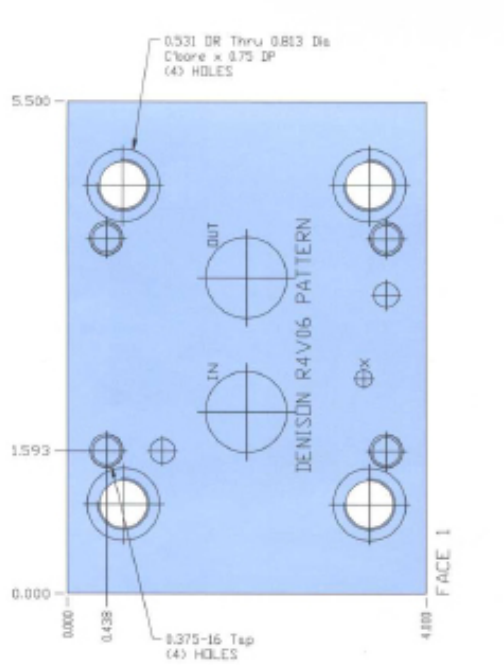

Figure 2: Parker Denison Pressure Relief Valve R4V0657310A1

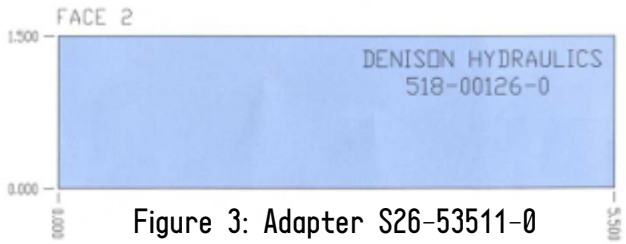

Figure 3: Adapter S26-53511-0

An adapter designed to accommodate the mounting interface between a Denison R1V12 configuration and an R4V06 configuration. The proposed replacement combination must be evaluated and verified for dimensional and functional compatibility with the original installation before it is accepted for use.
See figure 3 above.
