

SUCTION PORT OPTIONS & ADAPTERS FOR PARKER F1

RB & LB Pump Options (ISO)

The “B” designation indicates a 1-1/4” suction port with BSPP threads. This is not a common option. Instead, Parker offers units with an adaptable suction fitting, which must be purchased separately. See page 63 in the [Parker F1 Pump Catalog](#).

F1-101-RB-__-__-000 (3784100)

RU & LU Pump Options (SAE)

For SAE units, the product code includes the designation “U.” This indicates that the main port has an SAE adapter thread of 1-1/16”-12 UN. However, the appropriate suction fitting/adaptor must still be purchased separately for the unit. See page 63 in the [Parker F1 Pump Catalog](#).
