

LOW PROFILE RAKE

LIFCO
HYDRAULICS & ATTACHMENTS

- Features an extra wide body with close tines. These are used after all the large rocks and big stumps have been removed. They work great to get all the loose roots and smaller rocks out, leaving you with a nice landscaped finish.
- Constructed from Canada and USA made T1 & AR400 Steel at all critical points.
- Thick shanks support themselves without gussets.
- Standard screening gap is 6 inches. We do custom sizes between 4" and 8" as well, please call for custom quote.
- Heavy Duty Low Profile Rakes are not designed for extreme applications (eg. Deep penetration in hard ground, ripping out large stumps and rocks, etc.). Please inquire about our Severe Duty Rakes.
